The Contest is Between the Fusion and Labor Farties.

MILWAUNTE, April 5.—The pullical campaign whice culminated to-day has been a memorable one. The contest was between the fusion (demicing to the contest was between the fusion (demicing and republican) and the people is (abort) party for circuit and superior court judges and ward representatives in the common croncil. The only state election to-day was for associate indge of the superior court. Harlaw S. Ordon, cemecrateways re-lected without opposition. Milwaukee county voted on judge of the direction of the discount of the superior coeffic. The democrates and republicans placed a fusion theset in the field against the labor party. At 10 o'clock to night twenty-fire city precints have been been beard from, giving D. H. Johnson, dem, and George H. Noves, rep., fusion unificial caudidates, 1140 majority over the labor randidates. The 17 additional city precints will probably neutralize this unjority, but the seven towns of the county will go atrough for the fusion candidates, who are probably elected by 2000. The labor party will elect about half the addermen and one-third of the supervison. Bach hodies will probably be democratic, as two-thirds of the aldermen hold over.

will probably be democratic, as two-thinds of the aldermen hold over.

FEMALE SUPPRAGISTS VOTE.

In many cities of the state by a preconcarted arrangement the laddes in bodies went to the polls and offered to vote, claiming to be enabled in do so by an inference courses by a recently exacted law allowing women to vote a school afters. In Sturgeon Eng. 100 of them voted, but elsewhere their builds were refused. In Belavan 30 prom ment laddes marched to the polls in the morning in a provission. A lively discussion followed, epecthea being made for and against the right to vate. After considerable excitenient the loard refused to accept the votes of the ladies. The 10th were blockaded until after 12 o'clock by ladies who persisted in offering their votes. A test case will be carried to the supreme court. Reports from interior cities are meagre. Columbus, Belavan and Tomah have elected republican mayors. In Be Fere the fusion republicans and democratis won over the laber party. Kenocha elected a full labor ticket. Midolpht. All but one tow mand fourtaen predincts in this city have been heard from, giving the efficient's county ticket 500 ms crity, over the ishor fixed. The labor ticket carried the city by 1500. The Anarchists Meet with in Overwhelm.
Chicago, April 5.—6:45 P. M.—Nipety-ti ron precincts out of \$39 give Bothe, rip., 10 138 majority over Nelson, Inhor. The present Indications are that the labor party has only carried one ward in the city. It is possible that the head of the ticket has been carried by the republicant by 25,000 to 30,000.

7:30 P. M.—The indications are that Roche's majority will be \$30,000. If the \$390 votes naturalized during the past month by the un bad labor party be added, the total labor vote will be nearly what Nelson's vote now promises to he in to-day's election. This means that the attempt to deliver the democratic vote to the omited labor party had filled utterly. Beturns received at the town hall for the stockyard district up to 6 P. M. indicate that Elines. Washburn, heading the reform ticket, which was allied with the Roche licket in city wards, has been elected city supervisor by a majority of 100 over all opposition.

Two hundred and eighty-nine precincts give Roche a majority of 25,019, with hitty precincts yot to hear from, exattered throughout the city, and will probably make no material change in ratio of gain for Rache.

It is reasonably sectain that the suited labor party elected two electmen and nothing else.

At 10:35 P. M. the count was closed for he night. Corrected returns from all but the epicelacts since Roche's majority at 25,163. The specimets since Roche's majority at 25,163. The precincts unice Roche's majority at 25,164. The seconably make no material sead as laid predicted. Three nights ago, before Robt.

PORTLAND, WEDNESDAY, APRIL 6, 1887. PROFESIS FROM EVERY QUARTER.

The East, as well as the West and South, is beginning to exclaim against the interstate commerce law, and it coke now as if nearly the whole country would soon to against it. The Busing E-rait voices the judgment of that con-ter of E-stern trade against the bill, by remark-ing that it will surely kill the grain and wool traits of Parker. trade of Boston. Formerly Boston got the same 18les on grain from the West as New York, But LOW, in the adjustment of smin rates to the At-Januic recheard, the trunk lines, taking the fattler hand as the basis, have made the rate to bow York from Charleso 25 cents per 100 poulds, exactly the same as the former rate, White for Laston ton patr rate is 30 cents. The Wood Irade of Baston has also received notice of an ingrease in rites from the Pacific clops, which the I double says must prove probibitors, and the butter and obesse trade of the city has been rediried of an increase of rates from the West. Thus, large part of Baston's export trade will be killed by the bill. New York, able to get lower rates, because she is nearer to the ton's trade, New England, therefore, is likely to te in a limitor to Join the South and West in their novement in congress next winter against

village paper on the Pacific slope. Thus, the Easten Herald, says: "The design of the bill was estensibly to equalize existing injustices in the direction of distances hauled, but that this should not be done by raising the long-haul rates is very plain." This, too, is the protest of Portland, Oregon.

Portland and Galveston and Mobile think the in-equalities that called for remedy were not to be remedied by raising the long-haul rate. Now there is another class of disappointed people. These last live in the towns of the interior. They thought, as the Arlington (Oragon) Times expresses it, that the bill, instead of raising the rates upon the long baul, would lower them upon the short had. But it hasn't turned out The roads do not reduce the rates to inter make up somehow; and, moreover, they know that if they once reduce their local rates they

surprising to bear from Boston the protest against the injury to ber grain and wool bus-ness, nor from the South the detaration that if the consequences had been foreseen the reprethe consequences and been foreseen the representatives from that section would have opposed the bill unanimously, nor from the West the dolettil complaint that the law hurts everybody and benefits nebody. Nr is it surprising to get a dispatch from Washington, made up from knowledge of the profests and appeals that come to the commission from all parts of the country, which says: "The very classes who were most clamorous for passage are among the first to make complaint of the barelness of its provisions. The fe ly of trying to make fron-clad rules for the government of commerce is already apparent. The railronds in every direction have been compelled to change their rates in anticipation of the corrying out of the statute, which makes the burden to be borne by the peo ple all the greater, and even for short distances the prices of tickets for carrying passengers bareadvanced 25 per cen." So much cleares, always is bingsight than foresight in this world.

I think the republican taket will win but as to whether the prohibitory amendment can be deleated, I am in doubt. A good many republicans will vote for the amendment, but those who have the time interest of the party at heart will vote against it. and she has a prohibitory amendment in her constitution. She has all the conditions for success demanded by the most ardent prohibition-is; and now let us sook at the picture of Maire: In Maine, in 1886 there were 1222 lin-nor dealers, of whom 1135 were retailers of sprit-nous liquous, and 1100 dealers in malt liquors, or one liquor dealer to every \$15 of the population. In the city of Bangor there are to-day 21) open salcone, or one for every 85 of the population. In Portland there are 150 salcons, or one to every 225 of the population. Sept. 11, 1886, Neal Dow declared that "there is not a city or town in Maine in which the law is not entirely ignored and intoxication in this state has not been perceptibly lessened." At the last session of the Maine legislaters a law was passed that makes the repolity for the first offense for solling even a glass of eweet o der imprisonment and a fine. The payment of a United States license is Under the key no apoth-carp can use wines or Under the firty no apothe erry can use wines or any kind of layor, wit into exception of alcoholo, in the man, wat not no of modificious or line putting up of physiologis prescriptions; or layoung the mode, the law packes the apothe-saryon into same finding of the keeper of the lowest fromer due in the late. Followku ther begen. 871. In 1882, six years after the law had gone into effect, there were in the state only 3461 salacies, or one to every 536 of the population. Here were above 1574 of 2805 saloons, nearly 50 per cent. If the ratio of saloons to population which existed under the prohibition law had continued under the tax law, the state would have had in 1881 8805 calcons instead of 3461, and would have to siny 10 060 instead of less than 5000. The revenue to the state under the tax law has been into to date \$8,163,021. These statistics were delicated by an eminent persist of hitchigan, Mr. D. Bathune Duffield, and presented by him to a large public meeting in D-frost.

law show that in seventy of the sighty-sight counties 1019 saloons have been extinguished and \$1 494 000 paid into the treasury as taxed.
When high license went into effect in Illinois in 1883 there were in the state about 13;000 saloons from which the state received a revenue of about \$700,000, a license of \$52 each. Sixteen months after the law went into flect the number of salous had been reduced to 2006, and the revenue derived from that source increased to \$1,5(0,000. In that br.af period 4000 salcons

had been wiped out of existence. In Chicago alone over 1000 disappeared in one year. In Springfield, the capital city of the state, the number of saloons had been reduced a few months later from 157 to 164, while the revenue from that course had risen from \$17,090 to \$52.-600 per annum, or 201 per cent. Ta Peorla, be-fore the high license law went into effect, there were 220 salones, paying license fees aggregat-ing \$22,000. In March of 1835 the number, of salones had been reduced hearly one-half and the revenue therefrom increased to \$65,000 a year, or nearly traisled. The conclusion of the whole matter is that in every lustance where prohibition has been tried I, has resulted, not is people by robbing it of a large revenue, while in every instance where high Heense has been adopted it has largely increased the revenues of the state and in no case this d to greatly reduce the number of salonns

By this time, it would notin, Portland ought to have enough of that nuisance that calls itself the Salvaticu Army. This gipsy organization, composed of traings and dead-beats of both seems too lay to wark, likes by profauling the name of religion. Hasn't this band of worthless men and brazen women, who parade our streets, unhing themreives the conter of a hand-lum crowd, and studied along with flags, strenness, drams and troupels, to the anap-ance and disgust of decent neople, bear "working this racket," as their own slang has it, about long enough in Perliand? It is easy enough to rid the city of the nuisance. This tag-rag of beggary and longeriem that works with mercentry calculation in the name of religion, can easily be started out. Its members live on contributions of fears, and the started out. outions got from a credulous public, who seem to say pose that the money goes to the support of an organization whose purpose is the ad-sancement of mornilly and religion; whereas, in fact, it goes to as disreputable an object as if It were given for the support of anyother of the various devices employed by worthless people for I ving at the expense of the community. Cholera is in Panama, and threatens Californin and Texas. With proper sanitary precations pholera can be excluded, and it is noted that the death-rate in India by the use of sanitary means to prevent the acourge of cholera done, was once reduced from 22.41 to 3.29, and later to 1.26. Proper satisfation has reduced the death-rate 6 per cent in Liverpool, 3/per cent, in Munchester, and in Lindon from 1100 in 1,000,000 to 400. Sanitation in London has also reduced the death-rate from 42.5 in 1895 to less than one-half of this rate in 1880. The reason why the smallpox, which is excluded from New York city, appears in the towns of Southern California is because the health offi-cers have to deal often with a class of superstitions people, like those in Montreal, who had religicus scrupies agaiost vaccination, frapriedity ignorance. In England the great reduction in the death-rate is largely accounted for by the falling-off in the deaths from the principal zymotic or "fifth diseases," which have sunk from an annual rate of 4.15 per 1000 between 1850 and 1570, to 3.40 between 1870 and 1889, and England can reduce the death-rate from cholera, reliow fever and smallpox.

One thing the public would like to know is this, to wit: Where is the law that gives our colles authority to discriminate between "gambling on the ground flear, and "cambling nostairs," and to protect up-stairs gambling while raiding ground floor gambling. Truly the mysteries of government, under municipal statesmanel ip, are great.

Mr. Bourne, of the police commission, denies indignantly the statement printed in THE ORE-CONIAN of recterday as a place of gamblers' goes in that he has been employed as an attorney Bourne tells the truth about the matter unquestionad, y.

PRETSHUM, April 5.—Six men were terribly burned by the explosion of molten metal in the converting department of the Edgar Thomas Steel Works at Braddock, Pa., this morning. He aided steel had been dumped into a portable ladde preparatory to pouring it into ingot

molds, when the liquid motal exploied and was

totleted in all afrections.
NO THEIRG OF THE SALERYO. NO TIDING OF THE SALKETO.

New York, April 5.—No tidings of the starrer Salerro, of the Witson line, have been heard a nee that vessel weapoken by the Elberon on the 27th of March, in a disabled condition, 660 miles from Halifax. In shipping circles there is some anxiety for her salety, but the agents of that line express every confidence that she will reach part.

ANOTHER PRIEST SUSPENDED. ANOTHER PRIEST SUSPENDED.

NEW YORS, April 6.—A rumor is an circulalistic that like, Dr. Intrasci, tector of Epiphang-church, has met with the fate of Dr. Carray, and has been suspended for ten days, for anisoting the McGipun de monstation Tursday high. Both, representatives of the acts history and Dr. Luttsch, decline to talk of the matter.

WM, KISSANE EOGELS.

His Record is Referred to in very Compli-

mentary Terms.

NIW ORLEANS, April 5.—Judge Alexander Walker, in a letter to the Evening Cheoniel, after reconsiling the recent discovered facts concerning Col. W. K. Rogers, says: "Two of our most respected citizons, gantlemen of the highest honor and of records for obtrairic bearing and valorious conduct in the west trying emergencies of the military series, were brought into close relations with Colenel Rogers during his service with tiem. Walker. They hear tealimony to his good conduct in that service, his efficiency, promptitude and fidelity to duty, and bynorable bearing on all occasions. He was one of the chief officers of General Welker, who came to this city after the surrender of Welker's commend. Walker the bore himself with manly dignity and propriaty. The only departure from this course of conduct was his acceptance of a challenge and hostife meeting. only departure from this course of conduct was asis acceptance of a challenge and hostife meeting on the field of honor forced then him by Col., Henry, whom he wounded in a fair and honorable due! at Bay St. Louis, in this affair a gentlemen now residing in this city, acted as a second, and will hear festiment to the honor able bearing of Regens. Gen. Wolker, who was the send of honor, in the history of his expedition refers in highly copulimentary terms to knorer's official hour, in the history of his expecition refers in highly complimentary terms to Rogers's official service while with him in Cantral America." After referring to an exhibition of the high traits of the honorable and manly character which have been conspicuous in Rogers's curser after his removal to the Pacific at pe, if is stated that other oridance is furnished of the good conduct and manly qualities of Rogers, which may be pleaded at least in mitigation, if not his full conformment, of the alleged miscode of his youthful days.

IN THES AND SCARFS

The Four-in-Hand is the most popular, while next in favor is its initiation, the made Four-in-Hand. There the are from 2 to 2% inches in width, and lare generally of tight shades, such as heliotrois, enlinon plat, sky and other light shades of blue, etc. Stripps, checks and figures are about equally popular and attractive. In striking cohurnst, however, to these shades are fine line of the affected by some of our heaviest swells. These are of a dark color, generally a brewn with large bright figures.

IN ATH AND DIEDS COURTES

FLAT AND PUFF SCARFS.

Because of the low cut of vests, are made nar-tower than last season, so as to show the shirt to advantage at the sides. Some, which are very beautiful are being introduced in light shades and colors, but it from thought that either the flat or just scarf will be much worm. IN COLLARS

There are but two styles which are much worn they and the straight skinding, or the standing with the conners more or less turned. The ends of standing collars are generally parallel, but there is a style shown with a V-slayed opening which is quite effective. Those with turned corners vary from the collar with the ends just turned, to the collar the ends of which rest upon the knot of the tie.

IN CUFFS

The linked is the fororite, the newest and most popular form having the corners rounded; but the lapped coff, with square corners, is also in considerable demand.

SHIRTS In fancy dolors will be considerably worn, thecks, stripes and many other designs are shown in great variety.

HANDKERCHIEFS

Show a fendency to lighter shades, which it is believed will increase as the season advances. Tan, in light, medium and dark shades, self-tacked or with black slitching, is very popular. For tull dress, pearl color, self-backed or spitched in black, is he correct thing.

It is really eduly g to find a great newspaper the great city of Poston protes mag against the Il for the same recern urged against it by the Plane paper on the Pacluc slope beeten Herald says: "The design of the bill was estensibly to equalize existing regulates in the errection of distances hauled, but that this check not be designed. should not be done by raising the long hand rates is very plain." This, too, is the protest of Partland, Oregon

harvirally, places situated I ke Boston and Portland and Galveston and Mobile think the inequalities that called for remedy were not to be remedied by raising the long-had rate. Now there is another class of disappointed people. These last live in the towns of the interior They thought, as the Arluntin (Oregon) Times expresses it, that the bill, instead of raising the rates upon the long baul, would lower them upon the short hau? But it hasn't turned out sc. The roads do not reduce the rates to inter-madiate places, because they know they will lose much through business which they must make up samehow, and, moreover, they know that if they once reduce their local rates they

Taking the circumstances together it is not surprising to hear from Beston the protest against the injury to her grain and wool bestness, nor from the South the deceration that if the consequences had been foreseen the repre-sentatives from that section would have opposed the bill unanimously, nor from the West the deleted complaint that the law shorts everybody and benefits nobody. Cholera is in Panami, and threatens Califor-nia and Texas With proper sanitary precau-cions cholera can be excluded, and it is noted that the death rate in India by the use of annitary means to prevent the scourge of cholers aloge, was once reduced from 22 41 to 3 29, and later to 1 20 Proper sanitation has reduced the dea h rate 6 per cent. in Liverpool, 2 per cent, in Manchester, and 1. London from 1100 in 1,60,000 to 400. Sanitation in London has also reduced the death-rate from 43 5 in 18-5 to less than one-half of this rate in 1880. The rest in why the smallpox, which is excluded from New York city, appears in the towns of Southern California is because the health officers have to deal often with a class of superstilicus people, the these in Monteel, who had religious ecrupies against vaccination, inspired by ignorance. In Logland the great reduction in t. e death rate is largely accounted for by the fall 2g-off in the deaths from the p incipa zymotic or "fifth diseases," which have suck from a annual rate of 4.15 per 1000 between 1830 and 1870, to 2.90 between 1870 and 1889, and only 2.43 since 1880 Sanitation as good as that of England can reduce the death rate from choins, rellow fever and smallnor

In district No. 40, just east of Mount Tabor, it was contempared to erect a schoolinuse, but it has been considered best to suspend action for this year. At Bloom Tabor, district No. 6, a tax of \$100 was vot 2d, with which to begin building, but the law requires that where a schoolinouse is to be built not less than on, fixed of the cost shall be provided for by a tax. As the \$100 tax does not provide the one-third required for the proposed building, it is not likely work will be commercied this year, unless the plans are considerably monarched. Both districts, it is stated, are in neel of school building, it is not they can be erected as your as possible.

BASEBALL NOTES. FOUR CLUBS ORGANIZED HEBR-A LIVELY SEA-

The baseball season of 1887 in Portland will onen early and, judging from the preparations made, there will be more eput in the diamond field than this town ever know before in one season. Aiready our professional club (those who play for gate-money) have been organized, and the due weather up to Moncay has been pittized in practice. Thould the weather be clear for the next three lays, the opening game of the season will probably lake place next ismady at The Daks, biveen he Portland and the Willamettes. The "ordinad nine will be made up as follows: Pitchers, Frank Ciristic and Councily; catchers, Timm, he and Mebus; second base, Fred Smith and Cirichens, Tirth days, Rewards in the outlete, stimpson, Neale and Dave Egan, brother of the challenges, which and the desired made of the first hand of indenning; third base, he wards in the outlete, stimpson, Neale and Dave Egan, brother of the stiff of the control of low clubs dear as discussed manager, and of low clubs dear as discussed manager and on the layer of the layer of the layer of the land of the layer of the layer of the land of the layer of the layer of the land of the layer of the layer of the land of the layer of the The baseball season of 1837 in Portland will onen

The Reason for the Present Condition of Affeirs.

San Francisco, April 5.—The wheat situation is just how attracting considerable attention herr. Many believe that a pool exists to advance prices, while others are confident that the market has been advancing on its actual merits. A gentleman who is probable the largest shipper of wheat on the const. was interviewed on the subject for day and the anst. The reason of the advance has been the poor prospects for the coming essent's crop, and the small supply of subject on band. Out of this cly, Stockton and Port Coata washenes, the stock levery light, and will not exceed 60,000 tons. This is a state of things never known to exist in the state before. The stock in Port Costa and San Francisco warehouses is 112,000 tons. Add to this the known outside stock only 177,000 tons is visible for home consumption or export. With the prospects of a very short crop and such a small stock on hand, there is no difficulty in assigning the came for the attention in the came of a very short crop and such a small stock on hand, there is no difficulty in assigning the came for the appoint of the supposition had a ring classe of ombination is thought to be a factor of advancing them. By the way, there is some talk note the brasks wheat and four being shipped here from the Rast. I dun't think that it will pay, for the reason that Nebrasks and such northern wheat is worth fully \$10 per ton iese than our own california wheat."

An entirely opposite view of the case was taken by the next grain man seen by the reporter. His views were as follows: "There is a heavy long interest only in the market probably tarked imancially by the hank crowd. Annow, parties who are inaugurating the present advances are known to be rely closely connected with that institution. The amorted shows clearly the effect of crossly connected with that institution. The surface shows clearly the effect of consoling for the lighted King

The craft was immediately taken in tow to McCallum buy and righted. A black and white checked shitt, and four decakins were found in the boat, but nothing more. Nobody at Equinatt knows anything about the boat and the frair is wrapped in mystery. Much pruse is due to the crews of the vessels and to the men at the dry dock for their prampt action, as the wind was clowing a perfect hurricane. A MUSIL RICUS DISASTER
